Portfolio

Summary

Computer Science student with knowledge of Java, Data Structures, Algorithms, Artificial Intelligence, SQL, and Full Stack Development. Experienced in building web and AI-powered applications using MERN Stack and OpenAI APIs. Interested in Machine Learning, AI, and developing innovative, scalable software solutions.

Skills

Programming: Java, C, Python

AI & Machine Learning: Machine Learning, Scikit-learn, Pandas, NumPy, OpenAI APIs, AWS PartyRock

Web Development: React.js, Node.js, Express.js, HTML, CSS

Databases: MySQL, MongoDB

Tools Platforms: Altair AI Studio (RapidMiner), Jupyter Notebook, Google Colab, VS Code

Core CS: Data Structures Algorithms, OOP, DBMS, Operating Systems

Coding Profiles: LeetCode, GeeksforGeeks, CodeChef

Experience

Microsoft AI Azure Internship

May 2025 - June 2025 Edunet Foundations

Learned AI and Machine Learning fundamentals on Microsoft Azure. Applied ML concepts to build, train, and deploy AI models for real-world applications. Built LeafLens AI, a deep learning-based plant disease detection application.

Projects

QueueCure — React.js, Node.js, Express.js, MongoDB, Socket.IO

May 2026

Built a full-stack hospital queue management system using React.js, Node.js, Express.js, MongoDB, and Socket.IO. Implemented secure JWT-based authentication with separate login and registration flows for Patients, Doctors, and Receptionists. Integrated real-time queue updates using Socket.IO, enabling instant synchronization across dashboards.

LeafLens AI — React.js, Flask, TensorFlow, Gemini API

Jul 2025

Developed a full-stack web application for plant disease detection using a CNN-based TensorFlow model achieving over **93% validation accuracy**. Built an interactive React frontend supporting image upload, camera capture, weather insights, and AI-powered disease recommendations using the Gemini API. Optimized the Flask REST API for fast image processing and prediction, delivering treatment recommendations with confidence scores in real time.

Cryptocurrency Price Analysis — Python, Pandas, Scikit-learn, XGBoost

May 2025

Improved cryptocurrency trend prediction accuracy to **74.04%** across Bitcoin, Ethereum, and Cardano datasets. Engineered domain-specific features and optimized XGBoost hyperparameters through systematic feature selection. Evaluated multiple machine learning models using MAE, RMSE, and R^2 metrics for reliable forecasting.

CareerConnect — Flask, JavaScript, Adzuna API

Aggregated **1000+** job postings through Adzuna API integration, reducing manual job search effort. Implemented job search, filtering, and personalized recommendations with a responsive user interface. Developed a secure Flask backend to manage API requests efficiently, improving search performance and ensuring reliable job data retrieval.

Achievements

Shortlisted among the **Top Scorers from 100K+ registrants nationwide** in the **Aspire For Her × Logitech Women Who Master Hackathon 2026** and advanced to the Zonal Round. where Developed **VentureSakhi**, an AI-powered application using **AWS PartyRock** during the hackathon to support women entrepreneurs with personalized business guidance and resources.

Certifications

- NPTEL: Affective Computing & Foundations of AR&VR
- AWS Academy Graduate: Cloud Foundations
- HackerRank: Java & SQL Certifications
- Cisco: CCNA (Introduction to Networks) & Python Essentials

Education

Bachelor of Technology, Computer Science and Engineering

2023 – 2027

Sagi Rama Krishnam Raju Engineering College, Bhimavaram

CGPA: 9.49

Intermediate

2021 – 2023

BIIT Junior College, Guntur

Percentage: 98%

SSC

2020 – 2021

Bhashyam High School, Kaikalur

Percentage: 99.5%
